SENATE BILL 00-184

BY SENATOR Evans

also REPRESENTATIVES Lee and Coleman.

CONCERNING PREVENTION OF DAMAGE TO UNDERGROUND FACILITIES

RESULTING FROM EXCAVATIONS.

Be it enacted by the General Assembly of the State of Colorado:

SECTION 1.

9-1.5-102 (3) and (6), Colorado Revised Statutes, are amended to read:

ARTICLE 1.5

Excavation Requirements

9.1.5-101. Legislative declaration.

The purpose of this article is to prevent injury to persons and damage to property from accidents resulting from damage to underground facilities by excavation. This purpose shall be facilitated through the creation of a single statewide notification system to be administered by an association of the owners and operators of underground facilities. Through the association, excavators shall be able to obtain crucial information regarding the location of underground facilities prior to excavating and shall thereby be able to greatly reduce the likelihood of damage to any such underground facility or injury to any person working at an excavation site.

9-5.1-102. Definitions. As used in this article, unless the context otherwise requires:

- (1) "Damage" includes the penetration or destruction of any protective coating, housing, or other protective device of an underground facility, the partial or complete severance of an underground facility, or the rendering of any underground facility inaccessible.
- (2) "Emergency situations" includes ruptures and leakage of pipelines, explosions, fires, and similar instances where immediate action is necessary to prevent loss of life or significant damage to underground facilities and advance notice of proposed excavation is impracticable under the circumstances.
- (3) "Excavation" means any operation in which earth is moved or removed by means of any tools, equipment, or explosives and includes augering, backfilling, boring, ditching, drilling, grading, plowing-in, pulling-in, ripping, scraping, trenching and tunneling.
- (4) "Notification association" or "association" means the Statewide Notification Association of Owners and Operators of Underground Facilities created in Section 9-5.5-105.
- (5) (a) "Operator" or "owner" means any person, including public utilities, municipal corporations, political subdivisions, or other persons having the right to bury underground facilities in or near a public road, street, alley, right-of-way or utility easement.
(b) "Operator" or "owner" does not include any railroad.
- (6) "Person" means any individual, acting on his or her own behalf, sole proprietor, partnership, association, corporation or joint venture; the state, any political subdivision of the state, or any instrumentality or agency of either, or the legal representative of any of them.
- (7) "Underground facility" means any item of personal property which is buried or placed below ground for use in connection with the storage or conveyance of water or sewage, electronic, telephonic, or telegraphic communications or cable television, electric energy, or oil, gas, or other substances. "Item of personal property" as used in this subsection (7), includes, but is not limited to, pipes, sewers, conduits, cables, valves, lines, wires, manholes, and attachments thereto.

SECTION 2.

9-1.5-103 (4) (a), (4) (c), (6), and (7), Colorado Revised Statutes, are amended, and the said 9-1.5-103 (4) is further amended BY THE ADDITION

(1) Architects, engineers, or other persons designing excavation shall obtain general information as to the description, nature, and location of underground facilities in the area of such proposed excavations and include such general information in the plans or specifications to inform an excavation contractor of the existence of such facilities and of the need to obtain information thereon pursuant to subsection (3) of this section.

(3) (a) Except in emergency situations and except as to an employee with respect to the employer's underground facilities or as otherwise provided in an agreement with an owner or operator, no person shall make or begin excavation without first notifying the Notification Association and, if necessary, the tier two members having underground facilities in the area of such excavation. Notice may be given in person, by telephone, or in writing if delivered.

(b) Notice of the commencement, extent, and duration of the excavation work shall be given at least two business days prior thereto not including the day of actual notice.

(II) The name and telephone number of the excavator; and

(III) The specific location, starting date, and description of the intended excavation activity.

(d) An excavator may request a written record of any information from an owner or operator of an underground facility regarding the location of specific underground facilities.

(4) (a) Any owner or operator receiving notice pursuant to subsection (3) of this section shall, AT NO COST TO THE EXCAVATOR, USE REASONABLE CARE TO advise the excavator of the location and size of any underground facilities in the proposed excavation area by marking the location of the facilities with clearly identifiable markings within eighteen inches horizontally from the exterior sides of any such facilities. Such markings shall include the depth, if known and shall be made pursuant to the Uniform Color code as approved by the Utility Location and Coordinating Council of the American Public Works Association. In the event any person is involved in excavating across a pre-existing underground facility, the owner of such facility shall, upon a pre-determined agreement at the request of the excavator or the owner, provide on-site assistance. ANY OWNER OR OPERATOR RECEIVING NOTICE CONCERNING AN EXCAVATOR'S INTENT TO EXCAVATE SHALL USE REASONABLE CARE TO ADVISE THE EXCAVATOR OF THE ABSENCE OF ANY UNDERGROUND FACILITIES IN THE PROPOSED EXCAVATION AREA BY COMMUNICATING DIRECTLY WITH THE EXCAVATOR AND PROVIDING DOCUMENTATION THEREOF, IF REQUESTED, OR BY CLEARLY MARKING THAT NO UNDERGROUND FACILITIES EXIST IN THE PROPOSED EXCAVATION AREA. OWNERS AND OPERATORS SHALL, WITHIN THE TIME LIMITS SPECIFIED IN SUBSECTION (6) OF THIS SECTION, PROVIDE TO THE EXCAVATOR EVIDENCE, IF ANY, OF FACILITIES ABANDONED AFTER JANUARY 1, 2001, KNOWN TO THE OWNER OR OPERATOR TO BE IN THE PROPOSED EXCAVATION AREA.

(b) The markings of underground facilities shall be considered valid so long as the markings are clearly visible but not for more than thirty calendar days. If an excavation has not been completed within the thirty-day period, the excavator shall notify the affected owner or operator and the Notification Association at least two business days, not including the day of actual notice, before the end of such thirty-day period.

(c) (I) WHEN A PERSON EXCAVATES WITHIN EIGHTEEN INCHES HORIZONTALLY FROM THE EXTERIOR SIDES OF ANY UNDER-GROUND FACILITY, SUCH PERSON SHALL EXERCISE SUCH REASONABLE CARE AS NECESSARY TO PROTECT ANY UNDER-GROUND FACILITY IN OR NEAR THE EXCAVATION AREA. It shall be the responsibility of the excavator to maintain adequate and accurate information DOCUMENTATION, INCLUDING BUT NOT LIMITED TO PHOTOGRAPHS, VIDEO, OR SKETCHES, AT THE EXCAVATION SITE on the location AND IDENTIFICATION of any under-ground facility throughout the excavation period.

(II) (A) If the information DOCUMENTATION maintained pursuant to subparagraph (I) of this paragraph (c) becomes lost or invalid, the excavator shall notify the NOTIFICATION association or the affected owner or operator and request an immediate re-verification of the location of any underground facility.

Upon receipt of such notification, such affected owner or operator shall respond as quickly as is practicable. The excavator shall cease excavation activities at the affected location until the location of any underground facilities has been re-verified.

(B) If the information DOCUMENTATION maintained pursuant to subparagraph (I) of this paragraph (c) is determined to be inaccurate, the excavator shall immediately notify the affected owner or operator and shall request an immediate re-verification of the location of any underground facility. Upon receipt of such notification, such affected owner or operator shall respond as quickly as practicable. The excavator may continue excavation activity if such excavator exercises due caution and care to prevent damaging any underground facility.

In the event of damage to any underground facility, the excavator shall immediately notify the affected owner or operator and the Notification Association of the location and extent of such damage.

(6) If information DOCUMENTATION requested and needed by an excavator pursuant to subsection (4) of this section is not provided by the owner or operator pursuant thereto within two business days, not including the day of the actual notice, or such later time as agreed upon by the excavator and the owner or operator or if the information DOCUMENTATION provided fails to identify the location of the underground facilities, the excavator shall immediately give notice to the NOTIFICATION association or the owner or the operator and may proceed and shall not be liable for such damage except upon proof of such excavator's negligence LACK OF REASONABLE CARE.

(7) (a) In the event of damage to an underground facility, the excavator, owner, and operator shall cooperate to mitigate damages to the extent reasonably possible, including the provision of in-kind work by the excavator where technical or specialty skills are not required by the nature of the underground facility. which SUCH in-kind work may be under the supervision and pursuant to the specifications of the owner or operator.

(b) IF DAMAGE TO AN UNDERGROUND FACILITY MEETS OR

EXCEEDS THE REPORTING THRESHOLD AS ESTABLISHED BY THE NOTIFICATION ASSOCIATION PURSUANT TO PARAGRAPH (c) OF THIS SUBSECTION (7), THE OWNER OR OPERATOR OF THE DAMAGED UNDERGROUND FACILITY SHALL PROVIDE THE INFORMATION LISTED IN SUBPARAGRAPHS (I) TO (VII) OF PARAGRAPH (c) OF THIS SUBSECTION (7) TO THE NOTIFICATION ASSOCIATION WITHIN NINETY DAYS AFTER SERVICE HAS BEEN RESTORED.

SECTION IX: OTHER LAWS AND REGULATIONS

Federal Laws:

49 USC 601223 (d) PENALTY FOR NOT USING ONE-CALL NOTIFICATION SYSTEM OR NOT HEEDING LOCATION INFORMATION OR MARKINGS

- A person shall be fined under title 18, imprisoned for not more than 5 years, or both, if the person knowingly and willfully -

(1) Engages in an excavation activity -

A) Without first using an available one-call notification system to establish the location of underground facilities in the excavation area;

(B) Without paying attention to appropriate location information or markings the operator of a pipeline facility establishes; and

(2) Subsequently damages -

A) A pipeline facility that results in death, serious bodily harm or actual damage to property of more than \$50,000; or

(B) A hazardous liquid pipeline facility that results in the release of more than 50 barrels of product.

OSHA Regulations:

1926.651 (b) UNDERGROUND INSTALLATIONS;

(1) The estimated location of utility installations, such as sewer, telephone, fuel, electric, water lines, or any other underground installations that reasonably may be expected to be encountered during excavation work, shall be determined prior to opening an excavation.

(2) Utility companies or owners shall be contracted within established or customary local response times, advised of the proposed work, and asked to establish the location of the utility underground installations prior to the start of actual excavation. When utility companies or owners installations within 24 hours (unless a longer period is required by state or local (law), or cannot establish the exact location of these installations, the employer may proceed, provided the employer does so with caution, and provided detection equipment or other acceptable means to locate utility installations are used.

(3) When excavation operations approach the estimated location of underground installations, the exact location of the installations shall be determined by safe and acceptable means.

(4) While the excavation is open, underground installations shall be protected, supported or removed as necessary to safeguard employees.

EXCESS FLOW VALVES, NEW DOT OPTION FOR GAS SERVICE LINES

Excess flow valves are now being offered by natural gas utilities as optional devices. As required by the Department of Transportation, these valves are being installed on new single residence natural gas

service lines at the customers' request.

An excess flow valve is a device designed to automatically shut-off the flow of natural gas if the service line is broken between the gas main and the meter, limiting the amount of gas that might migrate into a home. When activated, some models allow a small volume of gas to flow through the line. Other models will shut off the line completely. The bleed-by models automatically reset once the service line is repaired.

It is important to be aware of these valves during construction, as it may not be immediately apparent that a gas service line is cut. The flow of natural gas will stop, be much slower, and/or the odor may not be as noticeable. Please continue to take all precautions to ensure you do not damage or break a natural gas line, and contact the UNCC for locates two full working days before you dig, grade or excavate.

SECTION X: RECOGNIZING AND RESPONDING TO EMERGENCIES INVOLVING DAMAGED FACILITIES

Emergency situations include: leaks, ruptures, explosions, fires, severe settling or soil movement, weakened or damaged facilities and similar instances where immediate action is necessary to prevent loss of life, injury to persons, or damage to property. The following actions should be taken in response to various emergency/damage situations involving underground facilities:

NATURAL GAS

- 1) Avoid any open flames or anything that might start a fire. Do not start motor vehicles or electrical equipment. Remove ignition sources (cigarettes, cell phones, or anything that could create a spark or static electricity).
- 2) Evacuate the area and try to keep uninformed people out.
- 3) Abandon any equipment being used in the area.
- 4) Call 911 or your local fire, police or sheriff's office.
- 5) Do not try to put out a fire. If it's burning, let it burn; ask local fire fighters to observe and protect adjacent property.
- 6) Do not try to operate any pipeline valves yourself.
- 7) Never bury the broken or damaged line.
- 8) Call UNCC and facility owner.

PETROLEUM

- 1) Leave the leak area immediately. Warn others, if necessary.
- 2) Do not make contact with the escaping liquids.
- 3) Avoid creating sparks or sources of heat that could cause the vapors or liquids to ignite. Do not light a match, start an engine, use a telephone or even switch on/off an electric light.
- 4) Turn off any running machinery (engines).
- 5) If you come upon a leak or vapor cloud while in an automobile, do not drive into the area.
- 6) Call 911 or your local fire, police or sheriff's office. Provide them with your name, phone number, a description of the leak and its location.
- 7) Call UNCC and facility owner.

ELECTRICITY

- 1) Move equipment only if you can safely move it away.
- 2) If safe, stay on equipment/machine (unless on fire) until rescue workers arrive, keep others away.
- 3) If buried electrical line is struck in wet soil/conditions, the ground may become energized for a large area around the strike.
- 4) Call UNCC and facility owner.

WATER/SEWER

- 1) Do not close any valves in order to stop flooding (closing the wrong valve(s) may effect fire flows and/or possible contamination of potable systems).
- 2) If the water leak is from a septic line or system, do not come in contact with the water. This could be a health risk so don't wade in or work around this stuff.
- 3) Be careful of high pressure water. Some times the slightest scratch or vibration can let loose that pressure and it can blow you away.
- 4) Water can fill a trench or hole fast, making a quick exit impossible.
- 5) Be careful moving around trench areas with wet walls. Wet walls can easily cave in around you and before you know it you can become suffocated.
- 6) Sewer gas is highly flammable so be careful not to ignite it with cigarettes, matches, etc.
- 7) Call UNCC and the facility owner.

FIBER/COMMUNICATION

- 1) If fiber optic cable is cut, do not look into the end of it. It can cause serious eye damage.

Remember, even a scrape, nick, cut, tear, break, dent, etc., to a facility line should be reported to UNCC and the facility owner(s). If not promptly repaired, it could result in a future leak, service outage, explosion, accident, injury or death.
