

## Waivers of Tariff Provisions

---

In accordance with its Standards of Conduct Compliance Plan, Colorado Springs Utilities will post on this page a notice of each waiver of a tariff provision that it grants in favor of an affiliate, unless such waiver has been approved by the Federal Energy Regulatory Commission. The waiver will be posted within one business day of the act of the waiver.

### *Waivers:*

Colorado Springs Utilities has placed its transmission facilities under the functional control of SPP, which provides interconnection and transmission service with respect to those facilities pursuant to SPP's Tariff. Accordingly, Colorado Springs Utilities is not in a position to grant waivers of the tariff provisions applicable to the use of its facilities. If that situation changes and if Colorado Springs Utilities does grant such a waiver, Colorado Springs Utilities will post, within one business day of each occurrence, a notice of each waiver of any Colorado Springs Utilities open access transmission tariff provision that it grants in favor of its marketing function, unless such waiver has been approved by the Federal Energy Regulatory Commission.
