9:00 a.m.	Call to Order Pursuant to the Colorado Open Meetings Law and the City Charter, since three or more members of the Utilities Board may be attending this public meeting, it is noticed and open to the public. Pursuant to the Utilities Board Bylaws, this Committee of the Utilities Board will not accept public comments at this meeting.	Board Chair Donelson
9:05 a.m.	Acceptance of Minutes Oct. 20, 2025, Working Committee Minutes	Committee
9:10 a.m.	Safety Moment: Holiday Safety	Mike Francolino, Chief Customer & Enterprise Services Officer
9:15 a.m.	Compliance Reports: - I-1 Pricing of Services G-5, G-6 Annual - I-2 Financial Condition and Activities (to include Contracts Over \$500K**) G-7 (Quarterly July-Sept.) - E-2.3 Organizational Oversight – Compliance Frequency and Method - P-1.2 2026 Annual Planning Calendar - P-5.4 2026 CEO Performance Plan - P-5.4 2026 BER Scorecard	Tristan Gearhart, Chief Planning and Financial Officer Tristan Gearhart, Chief Planning and Financial Officer Natalie Watts, Strategic Planning and Governance Manager Natalie Watts, Strategic Planning and Governance Manager Renee Adams, Chief Human Resources Officer Natalie Watts, Strategic Planning and Governance Manager

	- E-2 CEO/Board Partnership Responsibilities – CEO Responsibilities - ECA/GCA update	Scott Shirola, Pricing and Rates Manager
9:55 a.m.	Supply Chain Update	Rich Norton, Supply Chain Management General Manager
10:10 a.m.	2026 Strategic Plan Overview	Natalie Watts, Strategic Planning and Governance Manager
10:25 a.m.	Rate Case Process	Renee Congdon, Utilities Division, City Attorney
10:45 a.m.	Net Metering Update	Tristan Gearhart, Chief Planning and Financial Officer
11:35 a.m.	Financial Impact of Government Shutdown	Adam Hegstrom, Treasury and Finance Manager
		John Hunter, Financial Planning and Risk Manager
12:00 p.m.	Adjournment	Board Chair Donelson

MINUTES
October 20, 2025

Rosemont Conference Room or by Microsoft Teams

1. Call to Order

Pursuant to the Colorado Open Meetings Law and the City Charter, since three or more members of the Utilities Board may be attending this public meeting, it is noticed and open to the public. Pursuant to the Utilities Board Bylaws, this Committee of the Utilities Board will not accept public comments at this meeting.

Board Chair Dave Donelson called the meeting to order at 9:01 a.m.

Present – Board Chair Donelson, Board Member Tom Bailey, Board Member Nancy Henjum and Board Member David Leinweber

Vice Chair Brandy Williams, Board Member Lynette Crow-Iverson, Board Member Kimberly Gold and Board Member Roland Rainey attended the meeting virtually.

Board Member Risley was excused.

2. Acceptance of Aug. 18, 2025, Working Committee Minutes

Board Member Bailey made a motion to approve the August meeting minutes and Board Member Henjum seconded the motion. The motion passed unanimously.

3. Safety Moment: Fire Prevention Month

Ms. Renee Adams, Chief Human Resources Officer, advised that October is National Fire Safety Month and provided information on smoke alarm and fire extinguisher safety.

4. Compliance Reports

E-2 CEO/Board Partnership Responsibilities – CEO Responsibilities

- Electric Cost Adjustment / Gas Cost Adjustment (ECA/GCA) Update
- Mr. Scott Shirola, Pricing and Rates Manager, reviewed the ECA/ GCA adjustment update.

I-7 Water Supply Management (Annual)

Ms. Jenny Bishop, Water Resource Planning Engineer, reviewed the I-7 Water Supply Management (Annual) report and proposed changes to the I-7.

Board Member Henjum asked if the Fort Lyon supply was in the Arkansas Basin, and Ms. Bishop said that it is.

Board Member Henjum asked what NMCI stands for. Ms. Bishop said it is the Northern Monument Creek Interceptor Project.

Board Member Henjum asked what effect on capacity bringing the Air Force Academy could potentially have. Ms. Bishop said that the J.D. Phillips facility was designed to process

approximately 20 million gallons per day. There is a lot of extra capacity for regional use as well.

Board Chair Donelson asked if water used in watering landscaping goes back into the wastewater system. Ms. Bishop said this water does not go back into the wastewater system.

Mr. Nicholas Peters, Chief Systems Planning and Projects Officer, said that there have been a lot of savings from energy programs.

Board Member Leinweber asked when the construction starts on Cheyenne Mountain. Ms. Bishop said she is not sure of the timeline to bring Cheyenne Mountain Estates online.

I-10 Treatment of Staff (Annual)

Ms. Heather Harvey, Human Resources Manager, provided a brief overview of the I-10 Treatment of Staff (Annual) Compliance Report.

Board Member Henjum asked when the last full Employee Climate Survey was conducted. Ms. Harvey said that the full survey was conducted in 2024, and that action planning is done the following year.

Board Member Henjum asked how many discrimination complaints have been received, and Ms. Harvey said that these are tracked as required by law. Ms. Harvey said there is a formalized process that is followed by Human Resources.

Board Member Bailey asked if any significant changes were anticipated for the Employee Policy and Procedure Manual. Ms. Harvey said that the latest promulgation only had 11 employee suggestions.

I-11 Compensation & Benefits G-9 (Annual)

Ms. Heather Harvey, Human Resources Manager, reviewed the I-11 Compensation & Benefits G-9 (Annual) report.

Board Member Henjum asked when the next compensation updates should be implemented. Ms. Harvey said any marked changes should be implemented in January 2026.

E-2.8 Emergency CEO Succession (Annual)

Ms. Adams reported on the E-2.8 Emergency CEO Succession (Annual) Compliance Report.

Board Member Leinweber said that the legislative section of the City does not have a Succession plan.

5. Government Streetlighting Revenue Requirement

Mr. Shirola provided an update on the Government Streetlighting Revenue Requirement.

Board Member Henjum asked if there is outstanding debt with the City. Mr. Shirola said that there is still debt, because the cost at one point was too much to cash fund, so this is being addressed over time.

Board Member Leinweber asked if there are still problems with vandalization and stealing copper from the streetlights. Mr. Tristan Gearhart, Chief Planning and Financial Officer, said

that the lights now contain aluminum and not copper, but there is still an expense to repair damage once it is realized that the streetlights do not contain copper. Board Member Leinweber asked if numbers can be provided for damage to streetlights through theft.

Board Member Leinweber asked how many streetlights are still fluorescent. Mr. Peters said that these are replaced as they fail or damage occurs with the LED lights. Mr. Shirola estimates 50% of the lights are LED.

Board Member Henjum wondered if there was an opportunity to do a brief presentation for City Council highlighting the relationship between Colorado Springs Utilities and the City.

6. City Code Changes: Lead and Copper Service Lines

Ms. Tara McGowan, Design Water and Wastewater Engineering Manager, explained City Code Changes to the Lead and Copper Service Lines.

Board Chair Donelson asked if there was a conscious decision to not include lead fittings and just the lead pipes. Ms. McGowan said that this was not led by the Colorado Department of Public Health and Environment (CDPHE), but by the Environmental Protection Agency (EPA).

Board Member Henjum if lead can be found through the routine testing that is performed. Ms. McGowan said that it can be found through water quality testing.

Board Member Henjum asked how often lead is found inside the customer's property and how that is handled. Ms. McGowan said that she is unsure.

Board Member Rainey asked if lead is identified and mentioned to the customer, does the customer have the option to have it fixed at their cost or not to have it fixed. Ms. McGowan said that the organization is not required to make those repairs on the customer's side or to require the customer to make those replacements.

Board Chair Donelson asked when using lead fittings were mandated to stop. Ms. McGowan said that eliminating the use of copper was dictated in 1969.

Board Member Henjum asked if customers are notified of this code change. Ms. McGowan said the communications team is working on a campaign to notify customers of these changes. Ms. Jennifer Jordan, Public Affairs Specialist, Senior, said that there is a campaign that outlines responsibility – this should be rolled out within the coming year. Board Member Henjum asked if the City Code change will be included in this communication, and it will be included.

Board Member Leinweber asked about forever chemicals and plastic piping. Ms. McGowan said that new residents are installing High-Density Polyethylene (HDPE). Board Member Leinweber asked if Polyvinyl Chloride (PVC) pipe has forever chemicals in it, and Ms. McGowan said that it does not.

Board Member Henjum asked what caused this code change. Ms. McGowan said that the Colorado Department of Public Health and the Environment (CDPHE) adopting different requirements caused the need for this code change. Board Member Henjum asked if there is still an EPA, Ms. McGowan said that the EPA is not going away.

7. How We Exchange Water

Ms. Katie Garrett, Engineer IV, gave an informational presentation on how the organization exchanges water.

Board Member Leinweber asked about decreased snowpack and increased rain amounts. Ms. Abigail Ortega, General Manager of Infrastructure & Resource Planning, said that is where storage comes into play. Ms. Garrett said that this is daily operation and there is a team in place to monitor and manage the water exchanges. Ms. Kim Gortz, Water Supply Resources Manager, said that water is moved in anticipation of major storm events – but the demand also decreases during these times.

Board Member Leinweber asked if the organization ever hits lower water rights. Ms. Ortega said that certain conditions must be met to store water.

Board Member Leinweber asked about water that is received from northern El Paso County. Ms. Ortega said this will go into the transit model.

Board Member Bailey asked how water quality is measured. Ms. Garrett said that as long as exchange rules meet the Colorado statute requirements, then water quality should not be much of a concern.

Board Member Henjum said that every time she hears about the water system, she learns something. She said she is impressed by the expertise of the Water Planning Department and how they manage the system.

Board Member Henjum asked how the knowledge of such a complex system is captured within the organization and shared. Ms. Ortega said that there are numerous process documents that have been developed and a SharePoint database has been created.

Board Member Bailey asked what the plan is for addressing net metering. Board Chair Donelson said that staff needs time to consider different options based on feedback received at the recent City Council meeting before they present to the Utilities Board. Ms. Renee Congdon, City Attorney Utilities Division said that this topic has not been noticed, so in order to discuss it, it should appear on the agenda. Mr. Gearhart said that a discussion topic on net metering can be expected at a future Utilities Board or Working Committee meeting.

Board Member Bailey asked about the process for requesting information to be included at a future meeting. Ms. Congdon said that the Board Chair sets the agenda so the item needs to come to the Board Chair so that it can be reviewed at the monthly agenda prep meeting. Another option is to bring the subject up during the Board Member comments section at the end of the regular Utilities Board meeting.

Vice Chair Williams said that some conversations need to be more timely, and a process needs to be worked out to allow this to happen.

8. Adjournment

UTILITIES BOARD WORKING COMMITTEE

**Rosemont Conference Room
121 S. Tejon St., South Tower, 5th Floor

Colorado Springs Utilities[®]

It's how we're all connected

Date: November 19, 2025

To: Utilities Board

From: Travas Deal, Chief Executive Officer

Subject: **Excellence in Governance Compliance Report
Pricing of Services (I-1)**

Desired Action: Compliance

Compliance: The CEO reports compliance with the instructions.

INSTRUCTIONS			
Category:	Utilities Board Instructions to the Chief Executive Officer	Reporting Timeframe:	November 1, 2024 – October 31, 2025
Policy Title (Number):	Pricing of Services (I-1)	Reviewing Committee:	Finance
Monitoring Type:	Internal	Monitoring Frequency:	Annual
Guidelines:	Rate Design (G-5); Electric and Gas Cost Adjustments (G-6)		

The Chief Executive Officer shall direct that pricing practices result in rates that are just, reasonable and not unduly discriminatory. Accordingly, the CEO shall:

- 1. Establish pricing practices that result in revenues that are sufficient to provide safe, reliable utility services to Springs Utilities citizens and customers.*

Springs Utilities prepares an annual revenue requirement for each separate regulated service to determine that revenue generated from current effective rates are sufficient to support all the budgeted expenses while maintaining strong financial metrics. As part of the five-year rate case approved by City Council on November 12, 2024, base rate increases take effect each January 1 for the years 2025 through 2029. Approved annual base rate increases by service are as follows:

- Electric: 6.5%
- Natural Gas: 4.0%
- Water: 6.5%
- Wastewater: 9.0%

2. *Establish pricing practices that maintain financial viability of each separate regulated service.*

All rate proceedings adhere to state statutes and City Code utilizing industry accepted pricing principles and methodology that demonstrate just and reasonable pricing that is not unduly discriminatory. Non-fuel base rate adjustments are submitted to City Council for approval and supported by cost-of-service studies forecasted to provide sufficient revenue to support non-fuel expense recovery. Non-fuel base rates are designed consistent with the principles established in the Rate Design Guideline (G-5).

The 2026 Rate Case approved by City Council on October 28, 2025, proposed several changes to Springs Utilities' tariffs and procedural actions including:

- Electric
 - Establishment of an Industrial Service – Large Load (ELL) Rate Schedule (effective January 1, 2026)
 - Modification to the Contract Service – Military Wheeling rate to include transmission cost (effective April 1, 2026)
 - Accepting conclusions and recommendations concerning two new Public Utility Regulatory Policy Act (PURPA) standards
 - Clerical corrections and/or revisions (effective January 1, 2026)
- Utilities Rules and Regulations (effective January 1, 2026)
 - Addition of substation and transmission fees and recovery agreement provisions related to ELL service
 - Changes to Large Load Requirement Study Fee applicability
 - Addition of \$200/hr. Hydraulic Analysis Report for basic analysis
 - Clerical corrections and/or revisions
- Open Access Transmission Tariff (OATT) Service
 - Clerical corrections and/or revisions (effective November 1, 2025)
 - Rescission of OATT upon entrance into Southwest Power Pool (SPP) Regional Transmission Organization (RTO) (effective upon entrance into SPP RTO), currently anticipated to be April 1, 2026)
- Transmission Owner Filing submittals for SPP tariff
 - Establishment of Transmission Formula Rate Template, Implementation Protocols, and 2026 Annual Transmission Revenue Requirement

The cost adjustment and capacity charge rate structures establish rates sufficient to recover fuel related costs. Electric Cost Adjustment (ECA), Electric Capacity Charge (ECC), Gas Cost Adjustment (GCA) and Gas Capacity Charge (GCC) rate adjustments are submitted to City Council for approval and forecasted to provide sufficient revenue to support fuel expense recovery. Fuel rates are calculated consistent with the Electric and Gas Cost Adjustment Guideline (G-6).

On March 25, 2025, City Council approved a change to the GCA effective April 1, 2025. Additionally, on June 24, 2025, City Council approved changes to the ECA, ECC, Green Power, GCA, and GCC rates effective July 1, 2025.

Date: November 19, 2025

To: Utilities Board

From: Travas Deal, Chief Executive Officer

Subject: **Excellence in Governance Monitoring Report
Financial Condition and Activities (I-2)**

Desired Action: Monitoring

Compliance: The CEO reports compliance with the instructions.

INSTRUCTIONS			
Category:	Utilities Board Instructions to the Chief Executive Officer	Reporting Timeframe:	July 1, 2025 – September 30, 2025
Policy Title (Number):	Financial Condition and Activities (I-2)	Reviewing Committees:	Finance; Program Management Review
Monitoring Type:	Internal; City Auditor	Monitoring Frequency:	Quarterly, Annually
Guidelines:	Local Vendor (G-7)		

The Chief Executive Officer shall direct that financial condition and activities and actual expenditures are consistent with Board Expected Results. Accordingly, the CEO shall:

1. Operate within total appropriations for the fiscal year and inform the Utilities Board of:

a. Significant financial variances

- 2025 projected Total Use of Funds to be \$1.60 billion a decrease of \$(225.0) million or (12.3)% from the 2025 Approved Budget of \$1.83 billion.
- Fuel expenses are projected to be \$(192.1) million or (38.9)% under the approved budget primarily due to lower actual 2025 natural gas prices than those projected at the time of the 2025 budget appropriation.
- Operating revenues are currently \$(142.0) million or (14)% under the approved budget due to a decrease in fuel costs that are being reflected in lower ECA / GCA revenue.
- Capital expenses are projected to be \$(36.0) million or (5.7)% under the approved budget primarily related to Las Animas Consolidated Company Shares shift from 2025 to 2026 and Labor and Benefits offset in Non-Fuel O&M.
- Non-fuel operating expenses are projected to be \$1.5 million or 0.3% over the approved budget primarily influenced by labor and benefits offset in Capital.
- Debt Service, Surplus Transfers, and Franchise Fees are projected to be \$1.7 million or 0.6% over the approved budget primarily due to higher debt service.

- b. *Expenditures that exceed the Federal Energy Regulatory Commission capital and operating and maintenance budget classifications in electric, natural gas, water, wastewater and common.*

	O&M	Capital
Electric	\$ (77,665)	\$ 33,365
Gas	\$ (104,636)	\$ 6,451
Water	\$ 976	\$ (40,651)
Wastewater	\$ 1,242	\$ (20,478)
A&G and Common	\$ (10,510)	\$ (14,696)
Utilities Total	\$ (190,594)	\$ (36,009)

Note: O&M is both fuel and non-fuel, non-fuel is over by \$1.5 million

2. Budget transfers, canceled major capital projects, or new major capital projects not funded in the Approved Budget over \$1,000,000

*Based on 2025 approval

3. Invest funds in accordance with Bond Ordinance requirements and Utilities Investment Plan.

All cash and investments are in U.S. Treasury Notes, U.S. Agency securities, repurchase agreements, Local Government Investment Pools, and secured bank accounts that comply with Bond Ordinance investment requirements and the Colorado Springs Utilities Investment Plan.

4. Ensure controls are in place for receiving, processing, or disbursing funds and allow only bonded personnel access to material amounts of funds.

Colorado Springs Utilities maintains adequate controls that are reviewed annually by an external auditor. Appropriate personnel have access to material amounts of funds. In addition, the City of Colorado Springs' Risk Management team has expanded insurance coverage of high-risk employees through a shared Crime Insurance Policy, which affords a financial backstop for employee theft, forgery, money order tampering, counterfeit money, and other elements of potential fraud and misappropriation.

5. Ensure receivables are resolved within a reasonable grace period.

Days Sales Outstanding (DSO) is the average number of days receivables remain outstanding before being collected. At the end of the third quarter of 2025, there is 23.85 of DSO.

6. *Settle payroll and debts in a timely manner.*

These conditions have been achieved as of this monitoring report.

7. *Ensure tax payments or other government ordered payments are timely and materially accurate.*

These conditions have been achieved as of this monitoring report.

8. *Operate within the applicable sections of the Colorado State Procurement Code and Springs Utilities procurement policies and procedures assuring legal and fiscal compliance with competitive acquisition practices, conflict of interest, favoritism and procurement from local vendors.*

Colorado Springs Utilities maintains written purchasing regulations that assure legal and fiscal compliance with competitive acquisition practices, avoid conflicts of interest, avoid favoritism, and promote procurement from local vendors. Total spending associated with purchase orders and contracts with local area addresses at 30.6% for the third quarter, with a target of 30%.

9. *Inform the Utilities Board of significant financial impacts on the Municipal Government.*

During the third quarter of 2025, there were no significant financial impacts on the Municipal Government.

Surplus Transfers are forecast to be \$36.1 million, which is below the budget by \$1.4 million or 3.7%.

The Office of the City Auditor is conducting an Audit to ensure surplus rates are set at the appropriate levels.

City Council and Clerk payment allocations are being reviewed by the City and Utilities.

QUESTIONS?

Proposed 2026 Chief Executive Officer Performance Plan

Renee Adams
Chief Human Resources Officer

CEO Performance Plan

Background

- Combination of CEO leadership competencies + enterprise Balanced Scorecard
- An agreement between the CEO and the Utilities Board outlining the CEO's priorities and outcomes
- Measures enterprise and CEO performance
- Reviewed by the Utilities Board in December for the coming year

Proposed 2026 CEO Competencies – No changes recommended

- Competencies comprise 50% of CEO Performance Plan
- Evaluated by the Board semi-annually (2x/year)
- Five CEO leadership competencies with equal weight (10% each)
- Proposed for 2026 (same as 2025)
 - Builds Effective Teams
 - Ensures Accountability
 - Drives Engagement
 - Balances internal/external stakeholders
 - Strategic mindset

Balances Stakeholders

- Anticipates and balances the needs of multiple stakeholders.
- Creates flexibility in the organization that is needed to respond to varied stakeholder needs.
- Demonstrates foresight about how stakeholder priorities will change and evolve.
- Optimizes decisions across the varied needs of internal and external stakeholders.
- Serves as a role model for considering cultural and ethical factors in balancing the needs of stakeholders.

Builds Effective Teams

- Builds strong-identity teams that apply their diverse skills and perspectives to achieve common goals.
- Builds a cohesive leadership team that drives the goals and success of the organization.
- Creates a culture with systems and processes that enable cross-functional teamwork.
- Instills a common mindset and team spirit across the organization.
- Models teamwork by working effectively with other leaders throughout the organization.

Drives Engagement

- Creates a climate where people are motivated to do their best to help the organization achieve its objectives.
- Motivates others by appealing to deeply held values and goals.
- Creates a climate that makes work gratifying and enjoyable.
- Ensures that people in the organization feel their contributions are valued.
- Energizes the organization by clarifying the broader purpose and importance of the work.

Drives Results

- Consistently achieves results, even under tough circumstances.
- Creates an organization that pushes forward in difficult circumstances. Eliminates obstacles that affect organizational performance.
- Gets results that have a clear, positive, and direct impact on business performance.
- Drives the organization to achieve results.

Strategic Mindset

- Sees ahead to future possibilities and translates them into breakthrough strategies.
- Leverages the organization's key differentiators to develop a viable long-term strategy.
- Explores future scenarios and possibilities to help the organization respond to change and shape the future.
- Revisits and updates business strategies in response to evolving market dynamics and organizational needs.
- Develops and integrates organizational strategies to achieve and sustain competitive advantage.

Colorado Springs Utilities[®]

It's how we're all connected

Proposed 2026 Enterprise Balanced Scorecard

Natalie Watts

Manager – Strategic Planning and Governance

Approach to Updating the Balanced Scorecard

- Gauge the appropriate measures
- Use mix of leading versus lagging indicators
- Determine what or who is best to measure against
- Make targets achievable yet challenging
- Review and input timeline
 - September-October 2025:
 - Colorado Springs Utilities leadership
 - November 2025:
 - Working Committee
 - December 2025:
 - Utilities Board meeting for approval

Proposed 2026 Balanced Scorecard

- 50% of CEO Performance Plan
- A key element of the Kaplan Norton Balanced Scorecard strategic planning model
- Supports Board's strategic focus on reliability, rates and relationships
- Measures performance in achieving organization's 5 Strategic Objectives
- Results reported to Utilities leadership quarterly
- Results reported to Utilities Board semi-annually (2x/yr.)

Proposed 2026 Enterprise Balanced Scorecard

Strategic Focus Areas Weighting (no change)

- Reliability - 40%
- Rates - 40%
- Relationships - 20%

4 Reliability measures weighted at 10% each

13 Rates measures with weightings ranging from 2.5% - 7%

5 Relationship measures with different weightings from 3% - 8%

Proposed 2026 Scorecard

Proposed 2026 Colorado Springs Utilities Enterprise Balanced Scorecard									
The Balanced Scorecard measures the organization's performance in achieving enterprise Strategic Objectives									
Utilities Board Strategic Focus Weight	Strategic Objective	Performance Measure	Responsible Officer	Weight	1 Does Not Meet Expectations	2 Partially Meets Expectations	3 Meets Expectations	4 Exceeds Expectations	5 Far Exceeds Expectations
Reliability 40%	Operational Excellence	1. Electric - SAIDI - Interruptions in minutes per year	Somer Mese	10.0	> 57.50 minutes	57.50 - 52.51 minutes	52.50 - 47.51 minutes	47.50 - 42.50 minutes	< 42.50 minutes

Supply Chain Update

Rich Norton

General Manager of Supply Chain

Tariff Impact

- **Tariff Volatility:** Weekly changes in trade policy are creating uncertainty and cost pressure across critical categories.
- **High Import Dependency:** Essential utility components—such as switchgear, solar equipment, valves, and cement—are heavily sourced from tariff-impacted countries including China, Mexico, Vietnam, and the EU.
- **Price Impact Forecast:**
 - Water and gas infrastructure components: 45–50% imported
 - Electric equipment: 60–70% imported
 - Cement and concrete: 18–22% imported

Strategic Response Framework – What is Utilities Doing?

- Continuous monitoring and federal advocacy to mitigate unintended tariff impacts.
 - Benchmarking with Large Public Power Council (LPPC) Supply Chain Working Group
- Exposure analysis on critical equipment (e.g., transformers, breakers).
 - Assessing inventory levels and opportunity to leverage domestic manufacturers.
- Supplier engagement and forward-buying strategies.
 - Assessing alternatives/substitutions for materials
- Scenario modeling for tariff impacts leveraging 3rd party.
 - Assessing cost and lead time impact.
- Supplier diversification and negotiation strategies.
 - Ensuring we have the correct mix of approved domestic and international manufacturers.
 - Strategic negotiations to lower the price of the good.

Supplier Expectations and Mitigation Actions

Suppliers are urged to:

- Audit product origin and content, including second-tier suppliers.
- Update contracts with tariff passthrough clauses and price review triggers.
- Accelerate qualification of nearshore/onshore alternatives.
- Share detailed tariff impact analysis with Utilities for joint mitigation planning.

Tariff Exposure

- Total Tariff Exposure: \$848K
- Tariff cost avoided: \$202K
- **Net impact: \$646K**
- Examples:
 - Specialty valve from Switzerland: \$441K tariff requested, \$40K avoided
 - Irby warehouse items: \$230K tariff requested, \$75K avoided

2026 Strategic Planning

November 17, 2025

Utilities Board Focus Areas: Reliability, Rates and Relationships

OUR MISSION	Provide safe, reliable and competitively-priced utilities to our customers.				
OUR VISION	Ready for today, prepared for a sustainable future.				
OUR VALUES	Safety, People, Trust, Responsibility, Collaboration, Continuous Improvement.				
STRATEGIC OBJECTIVES	Operational Excellence	Focus on the customer	Financial accountability	Support our community	Enable employee empowerment
2025 STRATEGIC INITIATIVES	Optimize business processes Develop enterprise prioritization	Enhance outage management communication	Align long-term financial plans	Implement Energy Wise	Promote safety maturity excellence

Utilities Board Focus Areas:
Reliability, Rates, Relationships

Our Mission
Provide safe, reliable, and competitively priced utilities to our customers.

Our Vision
Ready for today, prepared for a sustainable future.

Our Values
Safety • People • Trust • Responsibility
• Collaboration • Continuous Improvement

Strategic Objectives

Strategies

Strategic Approach

Division Priorities

Enterprise Priorities

STRATEGIC OBJECTIVE
Operational Excellence

Strategies		Priorities
Strategy 1.1	Priorities	
Adopt innovative technologies	1. Maximize: multi-year enterprise transformation designed to modernize how we manage assets, systems and operations 2. Digital transformation with automation and artificial intelligence: harness the power of technology to improve the way we serve our customers through a variety of technology projects	
Strategy 1.2	Priorities	
Optimize operations	1. Continue implementation of business management systems to ensure uninterrupted planning and delivery of utilities services by ensuring all processes and policies are properly documented 2. Continue integrated asset management implementation to optimize performance, reduce costs, and enhance service reliability	

Enterprise Priorities

STRATEGIC OBJECTIVE
Focus on the Customer

Strategies

Strategy 2.1

Anticipate and meet customer preferences

Priorities

Priorities

1. Enhance outage management communication to ensure a more seamless interaction with customers during outages
2. Enhance customer survey reporting for actional feedback and leverage trend reporting to pinpoint areas for improvement

Strategy 2.2

Enhance internal and external customer relationships

Priorities

1. Increase and improve communication and outreach to external customers providing information in advance of changes to rates, projects, and standards

Enterprise Priorities

STRATEGIC OBJECTIVE Financial Accountability

Strategies		Priorities
Strategy 3.1		Priorities
Mitigate financial risk		1. Collections modernization: make key improvements to expand customer options, tangibly reduce work, and increase payment efficiency 2. Enhance risk mitigation plans in risk register and ensure communication is cascaded 3. Refine 10-year financial plans
Strategy 3.2		Priorities
Responsibly use resources at the division, department and section level		1. Zero based budgeting: focus on eliminating legacy costs and ensure every employee is intentional with each line item to significantly reduce waste and improve financial margins 2. Promote responsible stewardship of operation and maintenance and labor budgets by optimizing resource allocation across section levels to ensure fiscal discipline and operational efficiency

Enterprise Priorities

STRATEGIC OBJECTIVE
Support our Community

Strategies		Priorities
Strategy 4.1		Priorities
Serve as a cooperative community partner	1. Implement Wildfire Mitigation Plan to protect infrastructure and provide community safety	
	2. Ensure successful integration with the Regional Transmission Organization to provide more efficient and cost-effective services to our customers	
	3. Continue YOUilities in the community volunteer program, encouraging team and personal volunteer hours for everyone in the enterprise	
	4. Continue enhancing readiness for large load prospects through large load studies, large load rate updates, and streamlined application queue processes	
Strategy 4.2		Priorities
Maintain and update long-term integrated resource plans	1. Complete integrated resource plan true ups to ensure we are capturing industry, technology and demand changes	
	2. Use integrated resource plans to track and support growth and various economic development factors	

Enterprise Priorities

STRATEGIC OBJECTIVE Enable Employee Empowerment

Strategies	Priorities
Strategy 5.1	Priorities
Encourage professional development and training opportunities	1. Develop Leader 2 Leader program to continue building a strong pipeline of leaders in the organization 2. Prioritize dollars to support professional development and training opportunities throughout the organization 3. Strengthen workforce capabilities through workforce and integrated human resource plans
Strategy 5.2	Priorities
Recognize, appreciate and value employees	1. Continue championing Total Worker Health 2. Promote safety maturity excellence 3. Roll out enhancements to our employee recognition system to deliver more meaningful, visible, and personalized accolades that celebrate individual achievements across the organization

Net Metering Follow-up

Utilities Board Working Committee
November 17, 2025

System Cost vs. Solar Credits

Sample Net Metering Customer

Illustration of System Cost

Summary of Previous Proposed Changes

- Maintain 1:1 credit of excess generation
- Changes to Access and Facilities, per day rate
- Changes to Access and Facilities, per kWh rate
- Addition of Demand Charge, per kW, per day
 - Originally proposed: Highest On-Peak Net Demand
 - Amended proposed: Average daily highest On-Peak Net Demand
- Applicable to all current and future residential and commercial Net Metering Customers, effective January 1, 2027

Typical Net Metering Customer Annual Non-Fuel Bill

Customer Feedback – Major Themes

- Maintain 1:1 credit of excess generation
- Honor previous customer investment
- Reflect benefit of solar
- Allow interconnection of larger systems
- Apply same rates as all other customers
- Credit bill for value of excess energy
- Battery considerations

Potential Future Rate Considerations

Net Metering

- Size of solar systems up to 200%
- Maintain 1:1 credit of excess generation
- Changes to Access and Facilities, per day rate
- Changes to Access and Facilities, per kWh rate
- Addition of Demand Charge, per kW, per day
 - Average daily highest On-Peak Net Demand
 - Summer and Winter differentiated

Net Billing

- Size of solar systems up to 200%
- Changes to Access and Facilities, per day rate
- Changes to Access and Facilities, per kWh rates for delivered energy
 - On-peak and off-peak
- Addition of excess energy credit rates for all received energy
 - On-peak and off-peak
- Excess energy exchanged at proportional on-peak and off-peak credit rates for bill credit

Potential Customer Outreach Opportunities

Options for public participation include:

Stakeholder Listening Sessions: Small group meetings with net metering and standard customers, installers, and advocates.

Online Feedback Portal: Dedicated webpage with background, FAQs, and a feedback form.

Community Survey: Gauge broader public sentiment on solar incentives, equity, and rate design.

Public Information Campaign: Clear messaging about why net metering is being revisited.

Public Forums / Town Halls: Host a forum to present the revised proposal and take questions.

Board/Council Presentations: Public process where representatives discuss and attendees observe.

Board Priorities for Net Metering Reforms

Rate Design Guidelines (G-5)

- Economic Efficiency
 - Rates act as a price signal
- Revenue Stability
 - Rates should recover the approved revenue requirement through sufficient and predictable revenues
- Equitable for All Customers
 - Rates should reflect cost causation and customer usage characteristics
- Customer Satisfaction
 - Rates should enhance customer satisfaction
- Customer Bill Stability
 - Customer bills should be stable and predictable

Net Metering Board Objectives

Board Discussion

Potential Financial Impacts of U.S. Government Shutdown

John Hunter, Manager of Financial Planning and Risk
Adam Hegstrom, Manager of Treasury and Finance
November 17, 2025

Customer resources

- We recognize the significant impact the government shutdown is having on customers
- We continue to offer a full suite of customer assistance tools, plans, and programs
- Resources:
<https://www.csu.org/customer-assistance/>

Direct payment impact

- Colorado Springs military installations are currently not paying utility bills due to the government shutdown
- Typical combined bill for these installations amounts to ~\$3.5-\$4.5 million per month
 - Currently behind by roughly 1 month
- The ultimate *credit* of the U.S. military remains sound. We anticipate fully collecting these revenues, plus applicable late fees
- Ultimate *timing* of these payments remains unknown

Secondary payment impact: commercial sector

- Federal contractors may delay bill payments
 - Colorado Springs EDC estimates there are around 200 companies in this sector
- Typical average bill for a commercial customer is \$18,000 per month
- No definitive way to currently forecast revenue impact, time of payment catch up and/or potential bad debt impact

Secondary payment impact: residential customers

- Payments from residential customers may be impacted by the shutdown
 - Estimates of non-military federal employees in Colorado Springs at roughly 15,000
 - Approximately 78,000 people in El Paso County receive SNAP (Supplemental Nutrition Assistance Program) payments
 - Word searches of call center logs for "shutdown" and/or "furlough" appeared 285 times as of Oct. 30
 - Many economic assistance programs are available, but may be depleted faster
- Typical average bill for a residential customer is ~\$274 per month
- Unclear how customers may reprioritize their finances in this environment - impact to revenue, timing of catch-up payments, and even bad debt is uncertain at this point

Potential financial impact

Adjusted debt service coverage ratio

- No material 2025 impacts anticipated at this time
- A deep and prolonged government shutdown impacting the local economy may result in an impact to 2026 results

Debt ratio

- No material impacts expected at this time

Days cash of hand

- Most recent forecast places this metric at 146 days at year-end (5 days below target) without shutdown-related impacts
- 1 day of cash = ~\$2 million
- We lose around 2.1 days cash on hand for each month the shutdown lasts from direct military billing
- Other nonpayment rules of thumb that would result in losing 1 day of cash on hand:
 - 110 federal contractor businesses not paying bills one month
 - 7,500 residential customers not paying their bills for one month
